

CS391	Entrepreneurship and Technology Commercialization (3 CH)	Focus: Regular	All
Pre-Requisite: Nil Instructor: Dr. Fahd S. Khan Office # G25, FBS, GIK Institute Email: fahd.khan@giki.edu.pk Office Hours: 2:00pm ~ 03:00 pm			

Course Introduction
This course introduces students to the fundamentals of entrepreneurship and technology commercialization. It covers the process of identifying, evaluating, and developing entrepreneurial opportunities, with a special focus on how technological innovations can be transformed into viable business ventures. Students will learn to design business models, develop commercialization strategies, and prepare entrepreneurial plans for technology-based startups.

Course Contents
The course covers the complete entrepreneurial process with a special emphasis on technology commercialization. Topics include the role of entrepreneurship in innovation and economic development, opportunity recognition, creativity and idea generation, feasibility and industry analysis, and the development of business models. Students will learn about intellectual property rights, legal considerations, funding sources, and strategies for technology commercialization such as licensing, spin-offs, and startups. The course also addresses marketing and financial planning, building and managing new venture teams, and strategies for growth and exit. Through case studies, assignments, and a final business plan project, students will gain practical insights into launching and managing technology-driven ventures.

Mapping of CLOs and PLOs			
Sr. No	Course Learning Outcomes ⁺	WA PLOs*	Blooms Taxonomy
CLO_1	Identify and explain fundamental concepts of entrepreneurship, innovation, and technology commercialization.	PLO 1	C2 (Understand)
